

- Grades K-8
- Promotes development of knowledge and skills in mathematics fundamentals.

Content

- 16 mathematics strands, including whole-number computation, fractions, decimals, geometry, measurement, probability, problem-solving, and applications.
- More than 1,600 learning objectives, together with a collection of diverse interactive exercises.
- Automatic support for detecting student needs and responding appropriately.

For the Student

- Each student's responses shape his or her unique path through the curriculum.
- Tutorials give general instruction or provide examples.

For the Teacher

- Results Manager lets teachers monitor student progress from any workstation and view all information onscreen or in printed reports at any time.
- Powerful customization features give teachers the option to select content strands and level of difficulty.

Math Concepts and Skills integrates a continuous diagnostic logic that assesses each student's learning of specific objectives and adjusts the experience accordingly.
